

Now you can talk in Gmail

- 1 Chat** - Send instant messages from directly within Gmail. When you go to your inbox, you'll be online.
- 2 Status** - See when others are online and let them know when you're online, away, busy, tired, whatever.
- 3 History** - Chats can be just like emails. Save them, search for them—never lose important chats again.

You can get started with this feature right now (it's always changeable in 'Settings'):

- ☑ **Save chat history** in my Gmail account - your chats will be saved under 'Chats' in your Gmail account.
- ☐ **Don't save chat history** in my Gmail account - your chats will not be saved or searchable in your Gmail account.

Sweet! Go to my inbox »
